

May 7, 2009 - Wool Spinning

Program Chairman Carolyn Volk introduced Susan Sipos of Cassadaga, a spinner and weaver. Mrs. Sipos presented a program explaining the different kinds of products that can be spun into yarn, allowing members the opportunity to feel each of the samples. She displayed many different kinds of hair from several different animals that she uses to spin into yarn. Mrs. Sipos also showed an afghan and a shawl she has woven on her loom of the yarn she spun. A petticoat that had belonged to her great-grandmother made of wool yarn was of great interest. She then demonstrated how yarn is spun on her own spinning wheel.
